

Mid-Atlantic Bargaining Report # 49 Thursday January 21, 2016

In the last Mid Atlantic bargaining report we informed you that after high level discussions between the Union and the Company during the last few weeks the Union bargaining committee gave the Company a proposal which addressed both parties' needs.

This week the Company rejected the Unions proposal and gave another unacceptable proposal to the Union.

CWA has made meaningful proposals yet the Company has rejected our proposals saying they don't go far enough to meet their needs. In fact, almost every proposal the Union has placed on the table has been rejected by the Company.

We are currently reviewing the Company's proposal and planning our next steps. In the meantime, we need every member to get engaged. The Company is still not hearing us so it is more important than ever that we take this fight to a new level.

Tell Verizon management that we demand a fair contract and let them know that **we are ready to STRIKE to get one!**
