**These countries, and 65 others, are moving middle-class families forward.**

USA

**This one is holding them back.**

Seventy countries provide a level playing field that lets workers make their own choice about forming a union. The United States isn't one of them. It doesn't have to be that way. The Employee Free Choice Act will strengthen America's middle class by making it easier for workers to join together and bargain with their employers for better pay, benefits, and working conditions.

Union leaders from around the globe are in Washington this week making their voices heard: the Employee Free Choice Act is critical to protecting workers' rights and lifting up the middle class.
